

KATADYN POCKET

PRODUCT CHARACTERISTICS

Technology:	Pump filter, ceramic depth filtration (0.2 microns = 0.0002mm pores)
Effect:	Eliminates bacteria, protozoa, cysts, algae, spores and sediments.
Output:	Approx. 1 l/min
Capacity:	Up to 50'000 litres depending on water quality
Weight:	Approx. 550 g
Dimensions:	24 x 6 cm
Material:	Aluminium, stainless steel, silicone, ceramic
Accessories:	Prefilter, bottle adaptor and carry bag
Article No.:	2010000

FACTS

- The first portable water filter - today a classic.
- Made from top-quality, durable materials. This is why the Pocket is suitable for the toughest of conditions and is the first choice for extreme adventurers.
- The tried and tested ceramic depth filter removes bacteria, protozoa and other disease-causing agents. The principle: The microorganisms cannot pass through the pores of the filter ceramic (0.2 microns) because of their size (greater than 0.2 microns = 0.0002 mm).
- Unlike disposable filters, the ceramic can be cleaned several times - even in the field.
- Improved, round pump handle for better ergonomics.
- Outlet hose with clamp for attachment to water containers.
- Measuring gauge indicates when the filter element should be changed.
