Diet: vegetarian, high-protein

✓ Ingredients for noodles

- ☐ half-fat cottage cheese - the best of the cube 500 g
- ☐ average eggs 2 pieces - up to 110 g after smashing
- ☐ cake wheat flour 150 g + 20 g to sleep
- ☐ vanillin sugar 16 g - small sachet
- ☐ salt A big pinch

✓ Other ingredients

- ☐ butter 60 g
- ☐ breadcrumbs 60 g
- ☐ blueberries 300 g
- ☐ cane sugar or regular sugar - you can skip Free to sprinkle
- ☐ yogurt, vanilla cheese or cream - to be served any quantity

Lazy noodles with breadcrumbs sweet

Before you start preparing noodles, I recommend first reading the whole recipe to prepare in advance for the next stages of execution.

✓ Step 1: Knead the cheese dough

In a deeper bowl, pour 2 medium-sized eggs and add the half-fat curd (a total of 500 grams). The best will be curd from the cube, e.g. cream, which is usually sold in paper packaging wrapped in transparent film, weighing 250 or 500 g.

With the help of a fork or hand in a glove, crush the curd with eggs. There doesn't have to be a smooth mass. Then add 150 g of cake wheat flour or 140 g of universal wheat flour. Also pour a large pinch of salt and a small sachet of vanillin sugar. Knead the whole thing until a very thick, lumpy dough is formed.

Tip 1: Vanillin sugar can be replaced with vanilla sugar or regular sugar with the addition of a few drops of vanilla essence or a little vanilla paste.

Tip 2: I didn't prepare these dumplings from the curd cake from the bucket. I think most of the curds are too rare for these dumplings. However, if you want to take a chance, the best choice will be a very compact, non-sour bucket cheese type Wieluń My favorite.

✓ Step 2: Cut the noodles

Prepare a clean, preferably wooden stool. Sprinkle it with a little flour, then line the portions of the compact cheese dough. Roll rollers about 2 cm thick from it, exactly the same as for hooves, then cut off noodles of similar size, but not larger than 2.5 x 2.5 cm. If necessary, sprinkle the rollers with a little flour.

✓ Step 3: Cook the noodles

In a wide pot, boil water. A flat teaspoon of salt pour in the moment the water starts to boil. However, salting water is not necessary.

Transfer the chopped noodles to the teddy and dip in the boiling water. After a while, lightly and carefully stir the lazy. After the noodles have flowed out on top, wait for about 90 seconds. Howl all the noodles, wait until you strain the excess water and place them on a wide plate or salater. In this way, cook all the portions.

Tips: Do not cook all the dumplings at once, because they stick together and fall apart, and the water will stop boiling. If the cheese noodles are not eaten immediately after cooking, pour a little oil into them and mix them carefully. They're not going to stick together.

✓ Step 4: Prepare the bun with butter

Start heating a large pan with a thick bottom (burner power lower than average). Put 60 grams of good quality breadcrumbs on it. Roast the bun for a few minutes constantly stirring it with a wooden spoon to slightly dim. In the pan, add 60 grams of butter. Stir the whole thing right away until the butter melts and combines with the breadcrumbs.

✓ Step 5: Add the noodles

Add all the cheese noodles to the hot bun on the butter and mix the whole thing on the low power of the burner so that the breadcrumbs with butter completely stick the noodles. After a while, remove the pan from the burner.

✓ Step 6: Serve with blueberries

Apply portions of lazy dumplings with breadcrumbs and add fresh blueberries. You can also put on plates a few blobs of thick cream, yogurt, skyr or vanilla cheese. The whole can still be sprinkled with powdered sugar, add mint leaves or lemon balm. Cinnamon or cane sugar also fits here.

Enjoy.

Dziękuję za wspólne gotowanie.

Będzie mi miło jeżeli dodasz komentarz ze zdjęciem. Ania
