Ingredients for the cake

Ingredients for the dough

cake flour 320 g - 2 cups

butter 200 g - 1 stick

medium-sized eggs 5

granulated sugar 170 g - about 3/4 cup

baking powder 2 teaspoons

firm plums 700 g

Ingredients for the crumble topping

wheat flour (coarse or regular) 65 g - about half a glass

fine sugar about 70 g - about 1/4 glass

butter 50 g - 1/4 block

Plum Cake with Crumb Topping

Baking pan: a 27/18 cm baking sheet or a 24 cm round cake pan.

Take the eggs and butter out of the refrigerator ahead of time.

To make this simple plum crumble cake, I recommend first

melting a stick of butter and setting it aside to cool. I melt the butter

in the microwave. Line the bottom of the pan with parchment paper, and use the remaining

butter to grease the sides of the pan. Press/

attach strips of parchment paper. I recommend cutting the strips

taller than the edges of the pan so the cake doesn't spill over while rising.

I used a medium-sized rectangular pan measuring 27/18 cm,

but you can also use a 24-cm round cake pan.

Step 1: Prepare the plums

If you've already prepared the pan (lined with parchment paper)

and melted a stick of butter (liquid butter cools quickly), then you can

start preparing the plums and the remaining ingredients. At the time

I was putting this recipe together, Hungarian plums had just started

appearing at the market (late July). So I bought larger plums.

I chose plums that were firm and not very juicy.

These plums are almost twice as big as Hungarian plums, so after washing,

drying, and pitting them, I cut each one into four

pieces. Hungarian plums just need to be cut in half. At this stage,

you can already start preheating the oven. Set it to 180 degrees with the

top/bottom heat setting.

Step 2: Beat the eggs with the sugar

In a small bowl, place cake flour or all-purpose flour—two

250-ml glasses, or 320 grams of flour. Also add two

teaspoons of baking powder. I sifted the flour and baking powder together, but

it's enough to just mix them.

Crack five medium eggs into a large bowl and add 3/4 of a glass of sugar—

about 170 grams. I use fine sugar because it dissolves quickly. Beat the eggs and sugar with a mixer on high speed

for at least four minutes. This is a very important step. The sweet

egg mixture should turn into a light, fluffy mass.

Step 3: Add the flour and baking powder

Reduce the mixer's speed to the lowest setting and, in a thin stream, begin pouring in the cooled, melted butter. Set the mixer aside. Now add the flour mixed with baking powder to the bowl. Do not mix the batter anymore; instead, stir it slowly with a spoon. Mix in all the flour this way.

Step 4: Pour the batter into the pan

Transfer the batter to a pan lined with parchment paper.

I used a medium-sized rectangular pan measuring 27/18 cm, but you can also use a 24-cm round cake pan.

Step 5: Arrange the plums and the crumble topping

Lightly dust the plum quarters with flour and arrange them over the entire surface of the batter. Place them skin-side down on the batter. Sprinkle the crumble topping over the plums.

Rub the crumble ingredients together with your hands in a separate bowl. You'll do this in literally three minutes. I used my favorite crumble recipe—crumble for cake. To cover the plum cake with crumble, I used half the amount from the recipe in the link.

Step 6: Bake the cake

Place the pan with the batter in an oven preheated to 180 degrees (top/bottom heat). Place it on the middle rack. Bake the cake for about an hour... up to 70 minutes. My cake baked for exactly 65 minutes. Testing this cake with a toothpick can be tricky, since the plums are juicy. Don't worry, though, that the cake isn't fully baked, and don't extend the baking time too much. If baked too long, the cake can dry out and won't be as moist.

After baking, slightly ajar the oven door. After 10 minutes, open

the door and remove the cake from the oven. Remove the sides and transfer the cake to a cooling rack

to cool.

You can also dust the plum crumble cake with

powdered sugar. It can be sliced while still slightly warm. Once cooled,

wrap the cake loosely in wax paper and store it in a plastic bag in

a dry, cool place. It will stay fresh for at least

two days. If you plan to keep the cake longer, store it

in the refrigerator under a glass dome.

Enjoy!
